SmartSmile: Retainer Lifetime Care Guide

Clinical Protocol to Protect and Preserve Your Smile

SmartSmile Orthodontic & Braces Clinic -- Official Resource

---

1. Why Retention is Vital for Life

- Teeth have natural biological memory and can drift without retention
- Wear full-time (22 hrs/day) for 3 months, then every night indefinitely
- Replacement retainers should be ordered if lost or showing cracks

2. Cleaning and Sanitizing

- Gently brush retainers with lukewarm water and mild liquid soap
- Never use boiling water or microwaves -- high heat destroys tray form
- Soak in retainer effervescent cleaner tablets twice each week

3. Storage & Safe Handling

- Always keep retainers in your hard-shell case when not in your mouth
- Keep out of reach of domestic pets who are attracted to saliva scents
- Bring retainers to all 6-month routine dental cleaning appointments
